## BORDER LEICESTERS

### 29th ANNUAL SALE

### WEDNESDAY 19<sup>TH</sup> OCTOBER 2022

at 12noon (SA) - ON PROPERTY - RALPHS ROAD, BINNUM SA

INSPECTION FROM 10:00AM | LUNCH PROVIDED

SALE INTERFACED WITH  
AUCTIONS PLUS

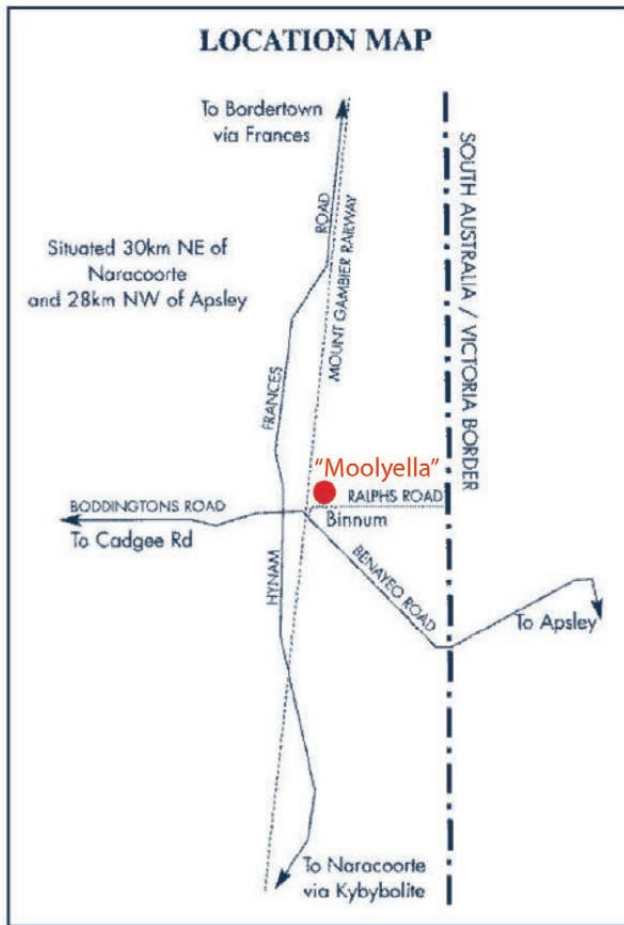

**RICHARD JENNINGS**  
Ph: 0428 616 554

4% REBATE TO OUTSIDE AGENTS  
INTRODUCED IN WRITING 24  
HOURS PRIOR TO SALE

**ALI HAYNES**  
Ph: 0439 350 252

## HEALTH STATUS

**Drenching:** The rams were drenched pre-sale with Paramectin. It is recommended that you drench all stock introduced to your property.

**Vaccinations:** All rams fully vaccinated with GlanEry (7 in 1 + B12)  
Scabigard used at tailing.  
Last GlanEry booster given on 20th September.

**SHEARING:** Shorn on 23rd July  
Although the property is free of lice, the rams were dipped post shearing with Coopers Blowfly & Lice treatment as a precaution.

**OVINE BRUCELLOSIS:** Accredited since foundation of the stud in 1973.  
Accreditation no.373

**OVINE JOHNE'S DISEASE:** MN3-V or 10 points certificate no. SO16V  
All the rams are OJD vaccinated.  
Gudair vaccination commenced in 2006.

**This year's Sale will be interfaced with AuctionsPlus**  
Please note that all new registered AuctionsPlus buyers are required to complete the Buyer Induction Training prior to bidding.  
AuctionsPlus recommends that all intending bidders have completed their registration and training 48 hours prior to the auction.

Simply search - 'Moolyella, Binnum, South Australia'

Welcome to our 29<sup>th</sup> annual on property ram sale.

We are excited to present our team of 170 rams for your selection, **the largest offering of SuperBorder\$ in Australia.**

This year's sale will be held in our new shed and sale complex just a few metres away from the old facilities. Hopefully by next year this will all be fully completed. It has been a busy year with house renovations in progress too and Josh, Claire and Harvey now living on the farm at "Moolyella".

Unlike the eastern states, we had a drier than usual Winter locally which was good for our stud ewes' lambing. Recent rains have boosted crops and pasture and we are enjoying a great Spring.

Lambplan has introduced a new ASBV called Weaning rate (WR) which replaces the previous fertility trait (NLW) This has impacted the BLX Index so please check the ASBVs and indexes on the percentile report in this catalogue to help re-benchmark your selection of rams. The 50<sup>th</sup>. Percentile index means that SuperBorder\$ in the 2021 drop must have an index over **115.67**.

### **All rams catalogued are SuperBorder\$**

Why buy inferior rams when better genetics can produce so much more? Use Deepwater rams to add more fertility, better carcase and growth to your first cross lambs.

Micron testing results this year show the effects of a higher protein diet but please remember it is still comparative within our flock.

We are dedicated breeders of hardy, naturally raised sires, ready to work in your flock.

AuctionsPlus will once again be interfaced with the sale. If you are unable to attend, video and photos of the rams will be available online.

Lamb and sheep are continuing to sell very well and you can invest in Deepwater genetics with confidence.

We are very proud of the success of our clients at Naracoorte and Edenhope Off-shears Sales.

We appreciate your support and look forward to seeing you at the sale.

*Judy, John, Jackson, Josh, Claire & Harvey*

**John: 0428 642 065 Josh: 0407 642 565 Email: [jdowdy@rams4ewe.com.au](mailto:jdowdy@rams4ewe.com.au)**

*Stud rams will be found among those catalogued. A minimum price of \$3,000 applies for rams to be registered.*

SuperBorders is the brand name for Border Leicester Rams that are of high genetic merit for a first cross production system. The official SuperBorder yellow ear tags allow SuperBorder rams to be easily identified.

To qualify as a SuperBorder a Border Leicester ram must be above the 50th percentile for the breed based on the BLX index {Border Leicester Cross Index}. The 50th percentile index value is calculated based on the 15th of August LAMBPLAN run each year. It is used to determine SuperBorder rams for that selling season. The BLX Index has been developed for production systems using Border Leicester sires crossed to Merino dams to produce first cross progeny. BLX balances maintaining mature size with significant improvements in early growth and reproduction.

A higher BLX index targets animals that are more profitable in this production system.

Not all rams sold by SuperBorder members are necessarily SuperBorder quality, but are bred by committed, registered breeders striving for genetic gain. SuperBorder rams must be structurally sound and of good breed type.

The SuperBorders group is made up of a number of studs across 5 states who work together in meeting market requirements for objectively measured maternal genetics in the Australian Lamb Industry.

SuperBorders members are industry leaders with longstanding involvement in research, trials and industry resource flocks.

First cross lambs sired by 100% SuperBorder rams may be sold as 'Bred from SuperBorders'. Special yellow pen cards and SuperBorders ear tags are available to identify these animals when sold in physical sales. Virtual yellow sale cards are also available for SuperBorders progeny sold on on line sale platforms. Please speak with us if you would like either of these marketing materials.

## ***Catalogue Abbreviations and Australian Sheep Breeding Values (ASBVs) explained***

---

- ID:** Ear tag identification. Further information on each ram is available from our database if the tag number is quoted or from [www.sheepgenetics.org.au/lambplan/](http://www.sheepgenetics.org.au/lambplan/)
- SIRE:** Stud sire of ram (See table for full sire I.D). If you are marketing your first cross ewes you might select rams from the same sire for a more even line of lambs.
- DOB:** Date of birth of each ram in 2021. All the rams have been run together and size differences may be due to age differences or being raised as a multiple or single lamb.
- BT:** Birth type.
- BWT:** (Birth Weight) Estimates the genetic difference in weight at birth in kg. Our lambs are weighed at birth. Too large a lamb may cause lambing problem or too small, low survival rates.
- MWWT:** (Maternal Weaning Weight) Estimates the dam's milk production and mothering ability at 100 days (weaning) in kg.
- WWT:** (Weaning Weight in kg) Estimates the genetic difference in growth at 100 days in kg.
- PWWT:** (Post Weaning Weight in kg) Estimates the genetic difference in growth at 225 days in kg.
- PFAT:** (Post Weaning Fat depth in mm) Estimates the genetic difference in fat depth. All the rams were scanned at post weaning. After a series of difficult seasons, most of our clients like their ewes to carry some fat, using leaner terminal sires to produce ideal second-cross lambs. However, those wishing to grow out first-cross wether lambs to heavy weights may wish to select leaner rams.
- PEMD:** (Post Weaning Eye Muscle Depth in mm) Estimates the genetic difference in eye muscle.
- YGFW:** (Yearling Greasy Fleece Weight) Demonstrates the difference in fleece weight between the rams when they were shorn during the first week in August.
- MICRON:** The raw data (not a breeding value) Micron test taken from side samples prior to shearing.
- PSC:** (Post Weaning Scrotal Circumference). Rams with higher scrotal circumference at an early age will, on average, sire daughters that are more fertile. Especially relevant for breeders seeking to join first cross ewe lambs.
- WR:** This new trait replaces the NLW ASBV and measures reproductive performance. Weaning Rate measures the number of additional lambs weaned per ewe joined. Weaning rate combines the traits of conception, litter size and ewe rearing ability into a single ASBV. This is new for 2022 and has caused changes in BLX index so please check the recent percentile table to help with your ram selection.

**INDEX:** The BLX index figures are from the 15/08/22 run in Lambplan. All the rams offered are above the average index of 115.67 as required by the \$SuperBorder\$ group this year.

**ACC:** (Accuracy) This shows the percentage of accuracy of each ASBV. Despite intensive and accurate data collection, young animals will only achieve higher degrees of accuracy when they have progeny tested and recorded in Lambplan.

**Report:** Genetic Trends  
**Analysis:** FIRST CROSS SIRE BREEDS  
**Analysis date:** 15/09/2022  
**Flock code:** 023626  
**Flock name:** DEEPWATER

**Total animals by drop**

Reports are prepared using data supplied by breeders and/or accredited operators. We cannot guarantee the accuracy of this data. ASBV's are designed to estimate genetic merit of animals from the data supplied. The reports are provided to assist breeders but no liability is accepted for the outcome resulting from the use of this information.

# ***MANAGEMENT OF YOUR NEW RAM***

The rams presented have been grown out on spring pasture to be in good working condition. Each ram has recently been drenched and vaccinated. Future management, especially in the next year will influence their productive life in your breeding program. Border Leicester rams are usually younger than other breeds of rams during their first joining due to being spring dropped.

We wish you every success with your purchase and suggest:

- Place new rams in a secure paddock away from older rams and unjoined females until mating. If absolutely necessary to introduce new rams to other rams before mating, try to lessen the risk of injury by confining the group in a small pen, eg. catching pen. Leave for 12-24 hours until more settled before releasing.
- Be aware that Ovine Brucellosis can be transmitted to rams from recently joined females as well as sexually active males.
- Injuries can lead to infection and require prompt treatment with antibiotics (especially lameness.)
- In the interval before mating feed your rams well. Remember semen is manufactured six weeks prior to use. If you are able to supplement your rams' diet with lupins it will improve semen quality.
- Your rams will perform better if they have a short fleece.
- Don't overwork rams in their first season. Preferably put them with older or mixed age ewes.
- After use treat them well, they are your investment for future years. Give regular drenches, 6 in 1 vaccinations, adequate nutrition and regular physical examinations to help ensure a long productive life.

Deepwater stud guarantees that our rams will successfully complete their first breeding season so if you feel a ram has failed to do this please contact us to discuss the matter as soon as possible.

*(conditions apply)*

If you would like any further advice, please feel free to contact us at any time on 0428 642 065.

# NATIONAL SHEEP HEALTH DECLARATION

July 2019

## Property Identification Code (PIC) of this property

This MUST be the PIC of the property that the stock is being moved from

SA172814

## Attached to accompanying NVD/Waybill No.

25726069

## SECTION A – Biosecurity Information

1. All consigned sheep are from a Livestock Production Assurance (LPA) accredited property?\*  Y  N
2. The number of different sources of sheep that have been introduced onto the consignment property in the last 5 years is:  
 0 (closed flock)  1-5  6+  Rams Only

## SECTION B – Animal Health Information

3. All consigned sheep are from a flock that is free of virulent footrot?\*  Y  N
4. All consigned sheep are from a flock that is free of benign footrot or scald?\*  Y  N  
*If (N) please provide further information below*
5. All consigned sheep are from a flock that is free of lice?\*  Y  N
6. All consigned sheep are from a flock in an ovine brucellosis accreditation scheme?  Y  N  
 If Yes, Flock Accreditation No. (except Qld) 373 Expiry Date 30/10/22
7. All consigned sheep are Johne's disease (JD) Approved Vaccinates?\*  Y  N  
 If Yes, I have been continuously vaccinating all retained lambs in the consignment flock against JD for 11 years. (Vendor-bred sheep only)
8. All consigned sheep are from a SheepMAP flock?\*  Y  N  
 If yes, Status MNSV Year commenced 1994 Certificate Number SA16V

\*See explanatory notes on back page for further information

9. All consigned sheep are from a flock with a negative test for JD?\*  Y  N  
 If Yes, which test? Blood test Date of test 1/1

10. Any other JD management practices carried out on the property?  
closed flock.

11. Any other relevant health information

## SECTION C – Treatment Information of Consigned Sheep

Treatment type	Product	Date of last treatment
External Parasite Treatment	Coopers Blowfly & Lice.	1 Aug
Internal Parasite Treatment	Paramectin.	<del>21</del> 4th Oct
Other treatments		
Vaccination (other than JD)	bin 1 glanvac.	19th sep

## Declaration (see explanatory notes for further information)

I Josh Dawdy  
 (Full name)
